RE: U.S. Patent Application No. 10/764,146
Mr. Wilson,

Enclosed, please find the revised patent correspondence. I feel that I have addressed all of the objections made, and corrected any typing errors that appeared on the originals.

Please note, that I have also included new drawings. I hope these are to your liking.

I have modified the patent by adding templates, and correcting some blatant mistakes made by the patent attorney, when he was drawing up the papers for me.

I have changed the order that the various fields appeared in to correspond with those that I have seen on the Internet.

I hope that all of the above meets with your approval, and would really like some feed back on this presentation, as I am doing this [as you might say] by my bootstraps.

Thank you for all of the time and effort that you have put into this. I would also like to thank you for your encouragement, without it I might have given up.

Respectfully Yours

A handwritten signature in black ink, appearing to read 'Don Patterson', with a long horizontal flourish extending to the right.

Donald R. Patterson
(Inventor???)
